

New Release Document – FileDirector becomes Efalia ECM

Lyon, October 10, 2023.

To FileDirector Distributors and Customers around the world:

In 2020, Efallia acquired the company Spielberg Solutions which develops and supports the solution FileDirector as a way to strengthen its position in the ECM and DMS market. EFALIA had been selling FileDirector in France and Africa for decades with prestigious customers such as Vinci Constructions, Credit Mutuel or OCDE. Acquiring this successful product and the team behind it has been a great success for EFALIA.

In 2022, the solution was then rebranded as Efallia ECM as a way to better fit in the overall Efallia Suite of solutions that we are now actively marketing.

Efallia ECM adds great value to our solutions portfolio and is now a critical asset in the Efallia Suite offering. On the other hand, being part of a complete suite gives FileDirector/ Efallia ECM new opportunities in the field of CCM, BPM and Portals.

Going forward, I want to make clear that Efallia ECM will continue to be further developed and supported by Efallia as one of our pivotal solutions for our valued Distributors and Customers around the globe.

You can rest assured that we will continue to further improve and support the solution on the long run as we continue our growth in the document management and business workflows software space.

With Efallia now in control, I want to continue to support the investments made by FileDirector Distributors and Customers over the years and I am convinced that together our expertise and the Efallia Suite will bring added value to the market and to our Customers.

Thank You for your continued support and your business!

Etienne Paillard

President of Efallia
